

BRITTANY

Watt-Wise Plus Program.
Because saving energy saves you money.

We're proud to be a part of the SilverLakes master planned community. As a Florida Quality Development, SilverLakes is dedicated to preserving and enhancing south Florida's resources. One of our most vital is energy.

Therefore, the homes at Brittany adhere to the Watt-Wise Plus Program which calls for many features that are energy efficient as well as improving your quality of life.

- R-30 insulation in attic space.
- High efficiency water heaters.
- Quality electric appliances are all energy-efficient rated to save you money.
- Soffit venting allows heat escape from attic areas.
- Programmable thermostats for air conditioning systems adjust the climate of the home according to times of use.

- Architecturally-coordinated insulated metal entry doors provide security and energy conservation.
- Exterior lighting improves security and increases outdoor living enjoyment. Brittany's homes are equipped with entrance and garage area exterior lighting.
- Conveniently located exterior outlets minimize use of extension cords, thereby conserving power usage.
- Prewiring for paddle fan outlets allows for installation of one of the most energy efficient fixtures of modern times.
- Five extra electrical outlets in the kitchen area.

The Adler Companies is proud to join SilverLakes in these efforts for conservation.
